Continuation of 11. does NOT place the application in condition for allowance because: Applicant argues that "the structure of the device in Blake is not the same as that recited in Applicant's claim 1 as evidenced by the fact that Blake cannot be operated the same way". Applicant has disregarded the fact that the Examiner has identified loop (44) as the finger loop and not loop (68) as stated by the Applicant. With loop (44) as the finger loop, it is the Examiners position that the operator will be able to reposition the other fingers between the first (32) and second (66) lever members..
